

Appendix Caverion Sweden
Caverion group Sustainability Report 2022

Caverion sustainability KPIs – Sweden status

Focus area	KPI	Definition of KPI	Actions	Sweden 2022
Decreasing Caverion's footprint	Total carbon footprint defined and measured	The material Scope 1-3 emission categories defined. All emissions from those material categories measured.	We continued improving Scope 1-2 measurements. Scope 3 categories defined and improved measurements on total Scope 3 emissions.	100%
Increasing Caverion's handprint	Five times carbon handprint over footprint (Scope 1-2)	Caverion offering's carbon savings for customers and society in relation to Caverion own Scope 1-2 carbon emissions.	We expanded carbon emission calculations for our positive handprint offering. Simultaneously aimed to decrease our own carbon footprint (Scope 1-2).	4X
Increasing Caverion's handprint	Our offering has a defined carbon handprint	Caverion offering which has a relevant positive carbon handprint defined. All of that offering is measured with its CO2 savings for customers and society.	We collaborated with key suppliers and engaged customers to development offering and handprint measurements.	25%
Caring for our people	Lost Time Injury Frequency Rate (LTIFR)	LTIFR refers to the amount or number of lost time injuries per 1,000,000 hours worked.	We invested in systematic safety work and strong proactive measures in safety.	5,2
Caring for our people	Share of female employees	Share of female employees.	We created a plan for longer term activities, started building awareness and local specific actions.	9,6%
Caring for our people	All employees trained in sustainability	Number of employees (excl. temporary, inactive, etc. employees) who have conducted Sustainability eLearning.	Our sustainability eLearning was launched in 2022.	67%
Ensuring sustainable value chain operations	Supplier Code of Conduct (SCoC) sign-off rate	Share of purchase volume of suppliers who have approved Caverion SCoC or who have a CoC/SCoC which Caverion has approved.	We follow-up on each Caverion division to increase the sign-off rate of SCoC.	60,8%
Ensuring sustainable value chain operations	All tender requests include sustainability criteria	Sustainability criteria for tender requests defined. Include sustainability criteria in all the major tender requests.	We held sustainability discussions with chosen key suppliers during 2022.	-

Caverion Sweden carbon footprint 2022

Scope 1-2 emissions 2022

Sweden

Caverion Scope 1 emissions (tCO ₂)		
Diesel (Service vehicles)	tCO ₂	2689
Diesel (Business vehicles)	tCO ₂	859
Gasoline (Service vehicles)	tCO ₂	26
Gasoline (Business vehicles)	tCO ₂	87
Natural gas (m ³)	tCO ₂	15
		3675

2022 data

Sweden

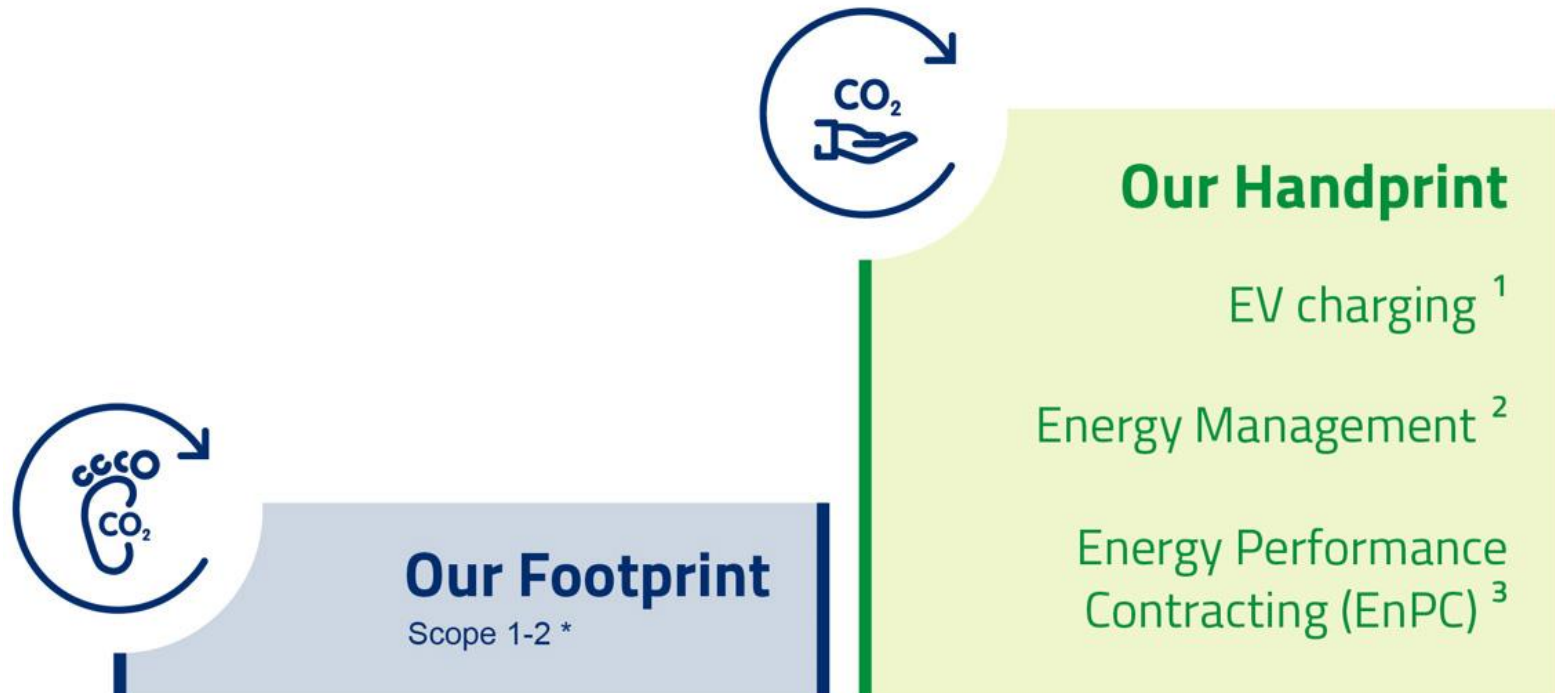

Caverion electricity, heating and cooling (Scope 2 emissions)		
Electricity	kgCO ₂	487807
District heat	kgCO ₂	275454
		763

Scope 3 emission 2022

Sweden business travel, flight emissions	87 tCO ₂

Source: CWT report 2022

In 2022, our handprint was four times the size of our footprint

*Our own energy consumption

- 1 Installation and maintenance of EV charging points
- 2 Energy management services
- 3 Energy efficiency measures for buildings combined with guaranteed results
